- Practice Salones: Centro De Estética Mariló Ruiz,Kybella Sandra
- Work duration for a day: 4h

DEPARTURES AND ARRIVING

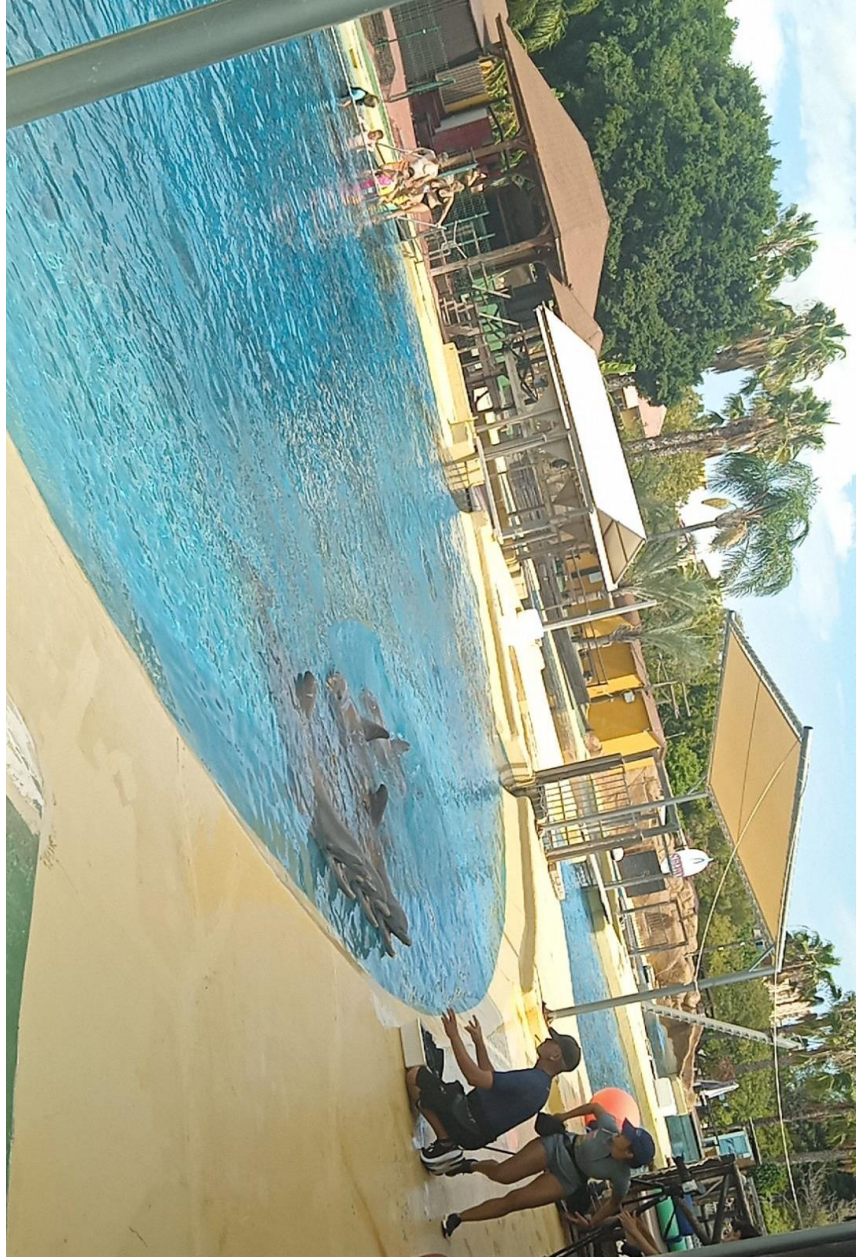

- When they informed me about this opportunity, I was glad to be a part of this. I was always interested in the Spanish culture and how they do my province here. That was my first longer plane trip, so the journey itself was new for me.
- When we get there, we went to the welcome meeting to Idomas Carlos V school. They greeted us with such a warmth and kindness. They gave us our cards for bus and recommended some nice place to visit/eat/and swim.
- After that we got home, looked around in our apartment before sleeping. The apartment and our room was very nice, just as the view from the balcony.

*FIRST
WEEKEND*

-
- In the first weekend we visited Selwo Marina delfinarium to see the dolphine show.
 - It started a little later so we had time to look around and visit other animals too.
 - That was a smaller institude but we saw a lot of things like aligator, monkeys, peanguens,snakes ext.
 - After that the dolphine show started and we really enjoyed it.

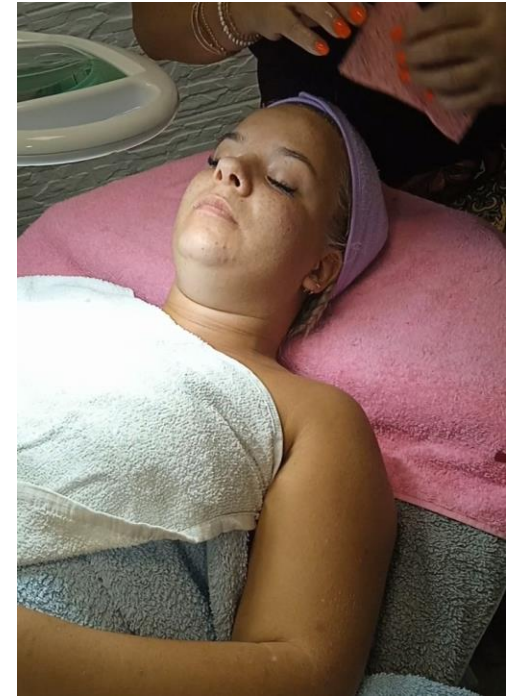

THE FIRST DAY

- In the morning we all went to the company ,so they can show us , one by one the salons where we will work. Our salon with one of the girls in upper grade was the Centro De Estética by Mariló Ruiz. When we get there we talked a little then one of her clients arrived. We watched her process and order of cosmetics, what she's doing differently ect.
- She asked me to do the same on her, so she can "see", mostly feel what im doing. In her opinion i did it great , but i need to use stronger moves /do it deeper.
- What i seen was a lot different what we usully do, how we usually do it, and different kind of cosmetic and machines. I enyojed to learn this new kind of practice.

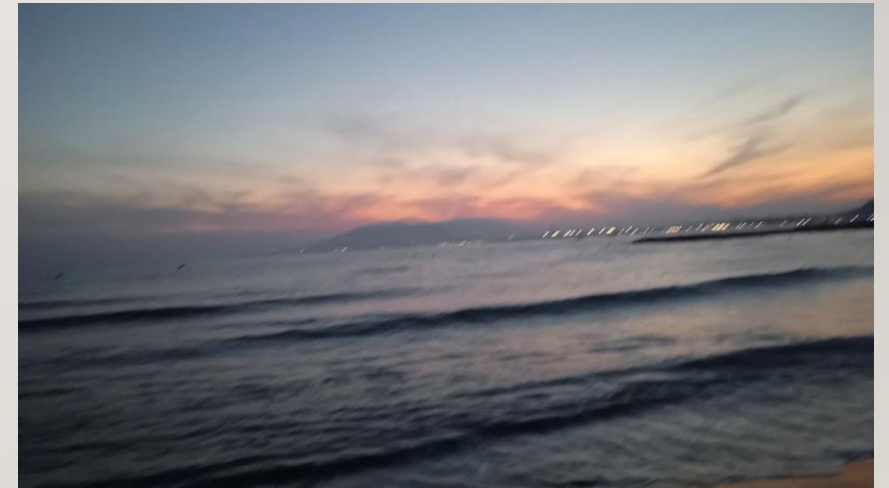

-
- Second day was not so different at the beginning. We practised on each other, used machine I never saw before and she showed us how that works. We showed her massage in our way, and she seemed satisfied with that. Some of her moves were similar than ours.
 - We went to a room where she's doing wax usually. She showed us her way to it, but we surprised. We never seen this method what she used, but we tried to meme what she did.
 - After that our day almost ended but with mutual agreement, we decided to find a new salon for us.

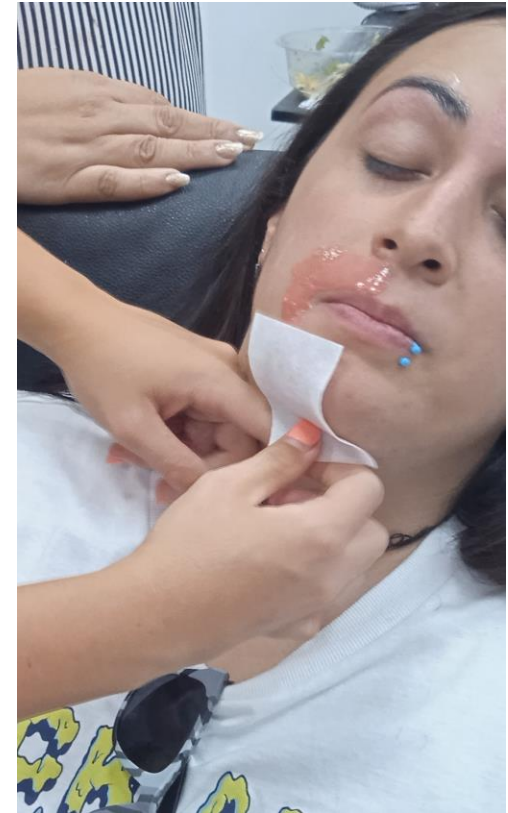

*WE TALKED WITH THE
COMPANY AND THEY
FOUND US A NEW
SALONE BY THURSDAY.*

*FIRST DAY IN
KIBELLA*

-
- In the morning we went to the school , so of Anna could show us our new salone to work. We agreed with her in the hours how we work, and who come for afternoon/morning.
 - She was really nice and patient with us .
 - We did waxing in the first day on each oher, she showed us before we tried. Her way was similar how we do it usually. After that we cleaned and our day ended. We tried churros after work and i also loved that.

-
- Next day a client came for mustage/ beard area waxing so we did it for her with the help of our tutor Sandra. We also did her eyebrows and arms.
 - On Wednesday/ Thursday we did a clients hair what was new for me .We did barids with fake hair, what was pretty long and in the end we curled it with hot water.
 - On Friday we needed to re-organize the salone and we can make each others hair/ She showed us how she do nails.

WEEKEND

-
- On the weekend we decided to explore the area of our apartment and visited the Alcazar of Malaga.
 - We walked all way up to see the beautiful view of the city and the sea. It was a really good experiance ,and took most of our day actually but it was worth it.
 - When we get down to the city we went to a restaurant called "El Pimpi". The food was amazing and the stuff were really kind. Turned out one of the waiters were Hungarian too.

SECOND WEEK

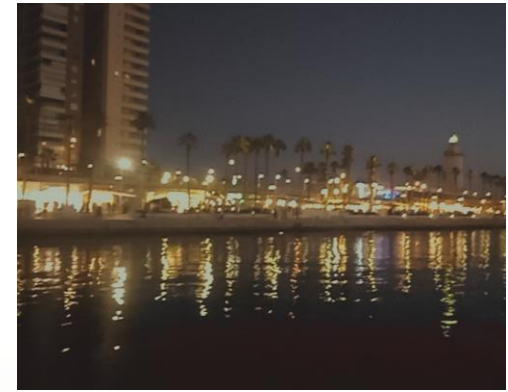

-
- In monday and thuesday we mostly did wax and cleaning. Mustage/ beard/eyebrow waxing for some client.
 - Wednesday and thursday we did braids again but for our tutor now ,with fake hair.That always took long time beacuse we dont usually work with hair , but we tried our best. Of course every day ended with cleaning, so that day too.
 - On friday we cut of some of the brainds we did for Sandra, to lighten the weight of her hair and make it more of her style.

WEEKEND

-
- On the weekend we visited the Catedral of Malaga what was so beautiful. We looked around, went outside to the little the park next to it, seen the Remains of the Roman Theatre and walked around the city then.
 - On the next day we visited beach Malagueta and at the afternoon we went to the centre to get on a tour boat to watch the sunset on the middle of the sea.
 - I think all of that was a really good experiance for everyone.

-
- We spent our time before work mostly looking around , in the beach or shopping just like this monday. After that we went to the salon ,where we loved to work.
 - Sandra showed us how she do nails, and we practiced on each other. We dont usually use these kind of equipments but we were curious about it all. So on monday and Tuesday we practiced.
 - On Wednesday started with doing braids for another client, but we needed to outcomb her old braids first and wash her hair. We did long braid for her also with brown fake hair . When we finished we also curled her hair too.

*LAST DAY IN
KIBELLA*

- Out friday was a little different now, cuz it was our last time in Kibella. Usually we do our things and work but now we bought our gifts with us for Sandra. And we get some surprise from her too! She baked us a brazilian food ,what looked like a muffin but was soury. It was filled with meath and vegetables. We get a braclet also, and she was so kind with us as always. She liked our gifts and even put it out to her fridge. We did each others hair and we said goodbye last time.

*LAST TRIP TO
SCHOOL*

- We had a last trip to the school to say goodbye, and give some gifts for all of the work they helped with. Anna asked us about our experience, we all can just say good things about our 3 beautiful weeks.
- They asked us if we would glad to participate again, and of course everyone said yes. We took photos with the Anna and her kind team.
- We went to the El Palo beach after the meeting for last time and chatted in our balcony. That was our habit, about the weeks what were behind us.
- We all had a really great experience, learned new things, tasted new foods and learned words/something from this culture. I am grateful that I could be the part of that.

*THANKS FOR
THE
ATTENTION!*
